Application

Tea & Coffee

Coffee and Tea freshness requires exceptional packaging. It is essential to avoid exposure to elements such as moisture, air, sunlight, and heat, which can adversely alter quality and taste. Our bags and pouches provide superior protection from exposure once opened. Flexible packaging is lightweight, easy to store, puncture and tear-proof.

Preserve your product's flavorful characteristics to achieve better customer satisfaction and retention. To such harmful factors. Functional add-on features, such as tear notches, resealable zip closures, and one-way degassing valves can further maximize shelf-life and add value to your customers.

Dried Fruit

Dried fruit is becoming more popular as consumer behaviors shift toward more health conscious options.

As demand is rising, so is the competition stand out among the healthy snack crowd with custom printed bags for your nuts and fruits.

Our packaging ensures your dried fruits look great on the shelf and keeps your product fresh, preventing it from drying out.

We offer a lot of choices from barrier film and even laminated film to protect snack against hazards such as odor, vapor, moisture.

Application

Nut

When it comes to packaging dried foods, Shibao's dry food packaging provides the essential protection your snacks and meals need. Our packaging meets all the necessary requirements made by the FDA, our customers, and more Products like pastas and rice, or pancake and cake mixes are difficult to safely manage, but our dry food packaging can make your job easier.

The variety of product packages we sell will help your food stay moisture-free and fresh, so you can maintain the nutritional value of your pouch contents while keeping your customers safe and satisfied.

Our team places just as much value on your branding as it does on the safety of your product.

Frozen Food

More people than ever are choosing ready-to-eat products as their go-to for putting healthy food on the table. The market has also expanded beyond fruits and vegetables to include proteins, pasta and many other foods.

This increased demand for frozen food products has also made it an attractive market for smaller, niche businesses to throw their hat in the ring.

The popularity of frozen foods makes it harder for brands to stand out from their competition. This is why custom food packaging is so important.

Application

Baby Food

Shibao are experts at baby food packaging. Stand up pouches for baby food serve as safe and effective storage, keeping the nutritious food inside fresh and free from contamination. Our baby food packaging is excellent at keeping oxygen and moisture out while locking in vitamins and flavor.

Our baby food packaging is compatible with many convenient features, like tear notches, re-closable zippers and spout corners.

You can also custom print your baby food packaging to promote brand

Powder

Powdered product packages for powder filling need to be both durable and beautiful.

Depending on their contents, they may also require FDA compliance, spoilage prevention, BPA content assessment and much more.

It's a lot to consider, and you can't make critical packaging decisions alone.

So whether you're an electrolyte company selling your very first product or an industrial powder product manufacturer reevaluating your packing needs, we're here to help.

Application

Candy & Gummy

Show off your product's personality with custom gummy bear packaging that's designed just for you.

Because, let's face it, that brown, wholesale packaging is doing you no favors.

In this blog, we'll cover what to look for when packaging gummy products so you can make an educated decision.

But first, let's take a peek at the market growth of gummy products and accessories.

Chips & Popcorn

Anyone who works in the snack industry already knows the importance of variety - from potato chips and pretzels to vegan granola snacks, the "chips" category now expands beyond everyone's perennial favorite: the potato chip!

Whether you're a health food company that specializes in low-calorie, vegan snacks or are more traditional in your offerings (read: potato chips!) We have the plastic packaging and custom packaging design you need to market your product.

Application

Cookies

The cookie packaging industry is huge, so we know how hard it is to stand out from your competition. Almost everyone likes a good cookie

so let's help you cut a bigger piece out of that pie, err cookie, with our custom professional packaging!

From traditional chocolate chip to over-the-top cookie bars, the right cookie packaging will help close your next major business deal. That's where multi-layer barrier liner films really do the trick in preserving your sweet treats. It'll be like your cookie came straight out of the bakery.

Spices

Spices are extremely susceptible to their environment. Moisture and oxygen will sap their potency and leave them bland and tasteless. You need packaging that keeps your spice blends safe and fresh for your customer to enjoy for a long time.

We specialize in working with many spice manufacturers to create a custom packaging solution just for you. We take numerous factors into consideration - what type of environment is right for your product, how long it will sit on a shelf and the end-user experience of your customer.

Application

Pet Foods

People love their pets, let's make sure they love your pet food brand too!

Consumers want high quality food and treats for animals, and that means that custom design of your pet food packaging is critical to compete for customers.

We accomplish this by combining a mixture of several different barrier films made specifically for your pet food to stay safe and fresh even when shipping across the country.

Our array of flexible barrier packaging designed specifically for pet food will give you an edge above the competition.

Pet owners care for their pets like children, which drives their purchase decisions. Pet food products must be adequately packaged with visual appeal, and cost-savings.

Try a transparent bag or a pouch with a window option to give customers a view of what's inside.

Cat Litter

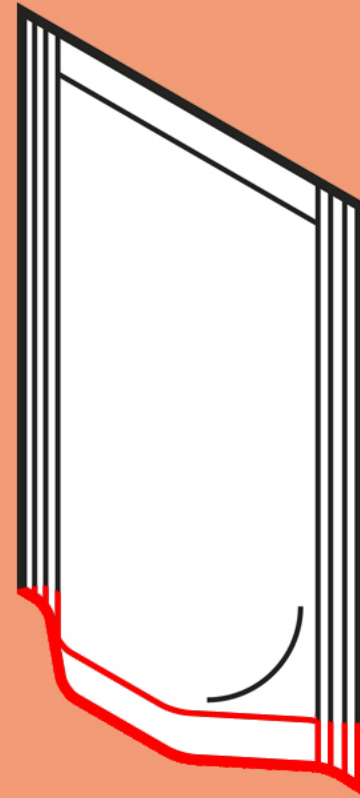

To preserve freshness and must also appeal the pet owner.

Shibao provides reliable packaging solutions in an array of styles, sizes, and colors to attract the millions of pet owners you are trying to reach.

Styles

Stand Up Pouch

Stand up pouches are manufactured with a bottom gusset which, when deployed, allows the pouch to stand up on the shelf in a store, instead of laying down like flat pouches. Commonly referred to as SUPs, this gusseted package have more space than a 3-seal with the same outer dimensions.

With over 50 films available, we have a material that will ensure your stand up pouch is of the highest quality. We can also combine materials in a custom order. You can combine a black film with a clear film, or metallized with a glossy finishing.

Flat Bottom Pouch

With square bottom bags from shibao, you and your customers can enjoy the benefits of a traditional bag along with those of a stand-up pouch.

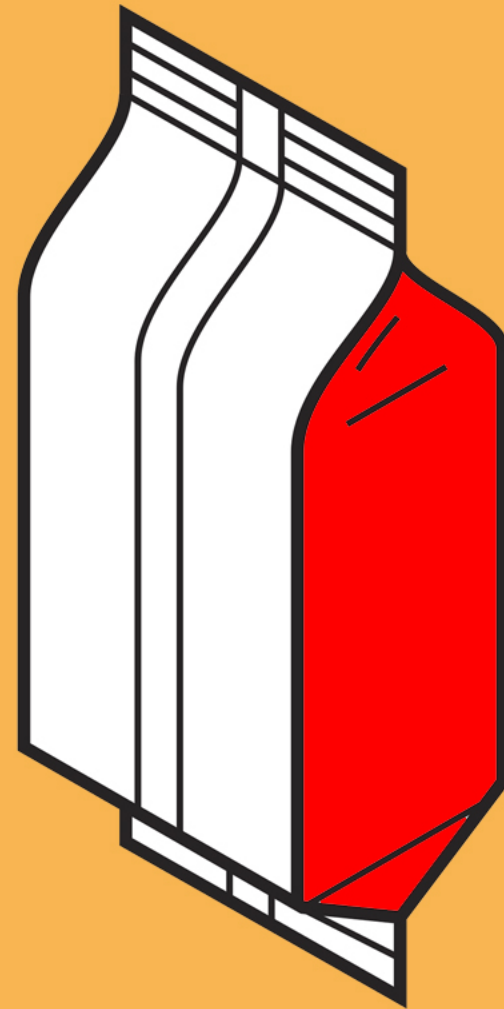

The combination of a box bottom, EZ-pull zipper, tight seals, sturdy foil, and the optional degassing valve creates a high-quality packaging option for your products. Order samples and get a quick quote today to find out how box bottom bags can help take your product to the next level.

Square bottom bags have a flat bottom, stand up on their own, and the packaging and colors can be customized to truly represent your brand. Perfect for ground coffee, loose tea leaves, coffee grounds, or any other food items that require a tight seal, square bottom bags are guaranteed to elevate your product.

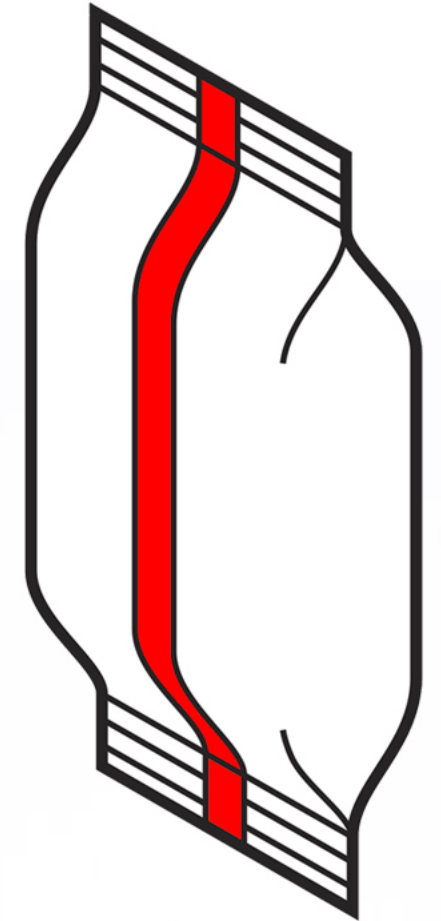

Gusset Pouch

A bold, versatile bag with large advertising face, where every side is a billboard! Collapsible gusseted sides give products added dimension and differentiation, and can either be displayed standing up or laying down. This bag style provides for easy case-packing and pallet stacking.

Back Seal Pouch

Fin Seal Pouches are available both as a finished pouch and a fin seal tubing ready configuration. Fin Seal pouches are a traditional pouch design that has been used successfully for years, and is predominately associated with high speed and automatic filling environments. Our customers can buy both Fin seal ready roll stock, and fin seal bags.

- High speed loading configuration.
- Compatible with pull-tab zippers.
- Available in Fin and Lap Configurations.
- Back Right / Front / Back Left layouts.
- Flexible designs.
- Printing

3 Side Seal Pouch

With lower price points than Stand Up Pouches, the 3 Side Seal Pouches are widely used because of their ability to be easily and quickly filled with product. In the 3 side seal configuration, you load your product in the same way that customers remove it: through the top. Additionally bags with zipper could be used without heat-sealing

If you think about it, a 3-side seal flat pouch could be the perfect packaging for your products. Easy and quick, load the 3 side seal pouch through the top, seal and done!

Your product will stay fresh and moisture and oxygen free until your customer opens the packaging.

Shaped Pouch

Unique: unlike other pouches, shaped pouches are more appealing to consumers as they have one-of-a-kind structure, design, and artistic printing.

Eco-Friendly: Shibao shaped pouches are manufactured using raw materials that are environmentally friendly as they produce reduced amounts of evasive waste.

Easy to store:shaped pouches come in different shapes and sizes that ensure maximum use of space. Their storage capabilities also make them best for shelf displays.

Spout Pouch

Shibao spout pouch can be used widely used in a lot of industries. With a tight spout seal, it acts as a good barrier guaranteeing freshness, flavor, fragrance, and nutritional qualities or chemical potency. Especially used in:

Liquid, beverage, drinks, wine, juice, honey, sugar, sauce, packaging
Bone broth, squashes, purees lotions, detergent, cleaners, oils, fuels, etc.

It can be manual or automatic filled from both the pouch top and from the spout directly.

Our most popular volume are 8 fl. oz-250ML, 16fl. oz-500ML and 32fl.oz-1000ML options, all other volumes are customized!

Kraft Paper Pouch

The stand-up barrier pouches with a frosted window are mainly made of brown kraft paper. Tearable grooves and re-sealable zippers give you easy access to the contents, and bags can be heat-sealed using an impulse sealer and a heat sealer.

A high-quality frosted window can also better display products. The inner CPP film brings high barrier protection to keep the product fresh. When it comes to convenience, these bags are the best choice.

Zipper Bag

Zipper bags are a type of plastic packaging with a locking mouth made from PE (polyethylene), PET/AL/PE, and PA/AL/PE plastic materials. Zipper bags have the common characteristics of being durable, flexible, and having a tight lock that can seal the mouth of the bag to store food from solid to liquid without using cumbersome strings. When the mouth of the bag is closed, the food inside will be better preserved and fresher for longer.

Vacuum Bag

PA/PE vacuum bags for packing and preserving dates and other dried fruits. Co-extruded films are used as a barrier film for bags making which used on vacuum sealer; Bags conserve aroma and premium product appearance as well as pack shape;

The high oxygen barrier and EVOH protect against light, water and vapor, creating an ideal atmosphere to preserve taste while extending shelf life and also provide high clarity and glossiness and excellent sealing

Strong Seals

Truly exceptional packaging starts with your choice in roll stock and roll stock supplier. At Formel Industries, we are committed to offering the highest quality service and roll stock for your company and products.

Whether looking to create your own packaging or planning to take advantage of our pouch converting services, our knowledge of printed roll stock will make designing your packaging an efficient and painless process.

Accessories

Tin Tie

Tin Ties are a common form of reclosure used in the coffee industry. Once the bag is opened it can then be securely reclosed by the end user with the Tin Tie to keep the product fresh.

Tear Notch

A pouch tear notch allows for the end user to easily open the bag after you seal it and ensures customers know the bag has not been tampered with.

Spout

Liquid spout bags, also known as a fitment pouch, are gaining popularity very quickly for a variety of applications. A spouted pouch is an economical and efficient way to store and

Valve

Degassing valve, also called one-way valve, allows gases produced in the bag to escape, preventing the bag from bursting. These valves are commonly used for coffee but can be used in any pouch application.

Zipper

Reclosable or resealable bags, also known as zipper bags or poly bags, are a great way to keep products safe from outside elements, keep food fresh and avoid spilling due to their locking capabilities.

Window

The clear oval window incorporated into the design of the bag offers a "sneak peek" of your packaged food item, allowing them to see your quality food product. Get consumer's attention while on the store shelves.

Hang Hole

Often taken for granted, hang hole bags are indispensable for many an application. It allows bags to go from shelf display to peg board in an instant. Retail ready packaging generally requires this usually placed at the center of your pouch.
